FACULTY OF DENTAL MEDICINE

Why doing it well while we are capable of better!

Preface:

In the name of Allah, the Most Gracious, the Most Merciful, and prayers and peace be upon His Noble Messenger, our master, prophet Mohammed.

In the beginning, on behalf of the whole Vice Deanship of Quality and Development team members, I would like to express our sincere gratefulness to our respectful Dean, Dr Mashael Al Qahtani, who believed in the capability of our team from day one. Also, for her continuous support and help during the academic year.

In addition, I would like to express my genuine respect and appreciation to the whole vice deanship team members, my brothers and sisters, who showed exceptional levels of dedication and discipline during the past academic year and worked with the spirit of (Why doing it well while we are capable of better!). Working with you was a pleasure, I learned a lot from you. Thank you!

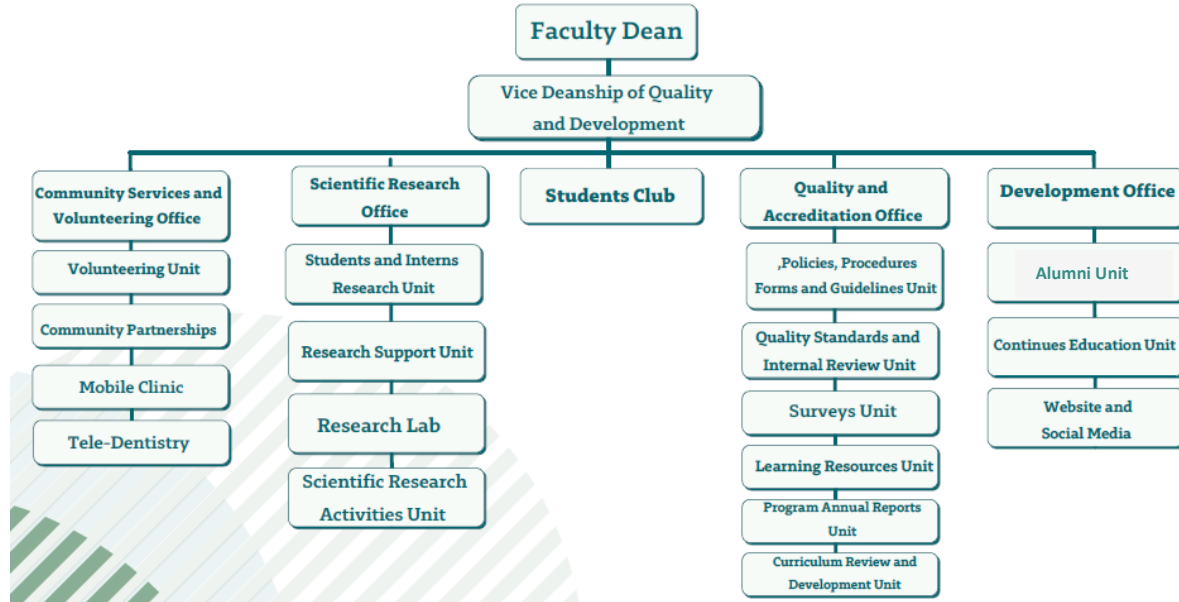

Despite the busy schedules, heavy burdens, tough tasks that we had to do in a minimal time sometimes, and all the obstacles we faced throughout the academic year. I hope that you enjoyed the journey and I wish that I was a transparent, honest and helpful member of the team.

After all, the achievements in this report are all yours, they are the outcomes of your efforts and hard work, and I believe that you have made a solid base for success in the upcoming years (Inshallah). All of you should feel proud of this. Let's enjoy the report now!

Regards,

Dr. Jameel A. Abuljadayel
Vice Dean of Quality and Development
