#### Comments by the Vice Dean of Quality and Development for Improving The Planning of SC in The Next Year:

- The number of the planned activities was very high, this was noticed immediately after students submission for the plan. Student Club leaders were informed about the issue and they were very optimistic and excited. The leaders were informed that we will follow up the planned actions and give a feedback at the end of the academic year. As one of the goals of the student club is to teach the students about leadership, planning, implementing and following up the results of the planned actions, a brief meeting was held at the end of the year to summarize the SC performance and learn from their experience during the past year.  
Generally, the club was active throughout the year, and the student did a great job and they should be proud of what they have achieved, however, Student club leaders ended up that meeting by realizing the following points.
- Although funding was an obstacle, however, with thorough planning, we can get achievements with the available resources.
- Plans should be specific, measurable, achievable, realistic and framed by time.
- Know the strength points and that there is always a room for improvement.
- With good time management, other achievements can be done in line with the busy schedule of a dentistry student!
