

Final report

It is my pleasure to have the opportunity to judge the final projects of the Physics Department - Umm AlQura University.

The proposed topics are on the leading edge of current research, and show important results. In these works there is a great effort that has been provided by the students and the supervisor.

I would like to congratulate the head of the Department of Physics for the seriousness that places on maintaining an excellent level.

After a careful examination of these three topics I suggest the following classification according to the importance of the work:

- 1) Quantitative Assessment of Annual effective Dose In Selected Samples of Bottled Water and Coffee In Saudi Market, Makkah Area, KSA
- 2) The Impact of Smartphone on the Human Health (Survey Feedback on the Applied Sciences College Females, Umm Al-Qura University)
- 3) The Impact of Daily Exposure to External and Internal Noise Sources on the Human Health (Survey Feedback on the Applied Sciences College Students, Umm Al Qura University).
