### B Objectives

1. What is the main purpose for this course?

The course aims at developing PY students' (Scientific Stream) English language skills that are necessary for success in their university core courses. Overall, this English for General Purposes (EGP) course revises the students' fundamental knowledge of the English language in the following areas: grammar, vocabulary, reading, writing, listening, and speaking. All students are required to successfully pass the EGP courses in the first semester in order to continue to the English for Specific Purposes (ESP) courses in the second semester which are especially tailored for various streams.

2. Briefly describe any plans for developing and improving the course that are being implemented. (e.g. increased use of IT or web based reference material, changes in content as a result of new research in the field)

Since 2016, a new curriculum has been developed and implemented in coordination with Oxford University Press (*Milestones in English*) for the specific needs of PY students at Umm Al-Qura University. This curriculum builds on the previous curriculum which was implemented for eight years by the ELC (*New Headway Plus, Special Edition*, by Oxford University Press) and solves the issues raised by language teachers and learners. The course works on three levels of English (Beginner, Elementary, and Pre-Intermediate) scaffolding the learners' proficiency step-by-step through recycling and revising the already-developed components and skills and then adding new ones gradually.

The course book is complemented with an excellent workbook which provides extra practice for the language skills and components in context. In addition to the workbook, the curriculum is accompanied by the *iTools USB* which includes the course e-book with embedded audio / video files and answer keys. The *iTools USB* also presents teachers with ready-made worksheets, assessment materials, and marking schemes for writing and speaking.

*Milestones in English* also incorporates an additional online component which consists of two parts. The first is the Oxford Online Skills Program which is an online practice component including various materials and exercises for extra practice on the four skills. The second one is the Oxford English Vocabulary Trainer that works on the lexical content of the book (unit by unit) by providing learners with definitions adapted for their level and with complementary exercises expanding their lexical repertoire steadily.

C. Course Description (Note: General description in the form used in Bulletin or handbook)

Course Description:

*English Language* (4800170 – 6) is an English for General Purposes (EGP) course which runs in the first semester of every year beginning in September and is offered to students in the Scientific Stream. It is a multi-level language course comprising the following four levels:

**Low level (Beginners):** These are students who score between zero and 24 in the **ELC Paper-and-Pencil Classification Test** which is offered online.

**Average level (Elementary):** The students who are grouped in this category score between 25 and 59 in the **ELC Paper-and-Pencil Classification Test**; and

**Higher level (Pre-Intermediate):** Students who score between 60 and 94 are placed in this category.

**Advanced level:** Students whose score is more than 94 in the above classification test are offered a choice of either not attending the course with a grade of 95 or attending the classes with reduced contact hours where they are tested with other students. If they choose to attend the classes, they have a chance of scoring more than 95 marks in the course. However, if they score lower than 95, the mark that they score on the test will be recorded in their file.

*English Language* (4800170 – 6) intends to develop students' knowledge and ability of English language in all skills of reading, writing, listening, and speaking as well as in sub-skills including grammar, vocabulary, and pronunciation. The course aims at preparing the students to advance their English to the English for Specific Purposes (ESP) level which is specialism specific and is offered in the second semester. All students are required to successfully complete the English Language course before admission to their specialism related ESP course offered by the ELC.

After putting students in different groups according to their specific scores in the **ELC Paper-and-Pencil Classification Test**, they are exposed to different hours of formal instruction ranging from 8 to 20 contact hours a week (see details below).

In a nut shell, as *English Language* (4800170 – 6) is a multi-level course, its course syllabus includes both specific and general schemes. The specific schemes are to do with the course delivery across different proficiency levels of English while the general schemes include a variety of in-class activities, exams and course related issues covering all the aforementioned levels of proficiency in a unified manner.

4. Course Learning Outcomes in NQF Domains of Learning and Alignment with Assessment Methods and Teaching Strategy
On the table below are the five NQF Learning Domains, numbered in the left column.
<b>First</b> , insert the suitable and measurable course learning outcomes required in the appropriate learning domains (see suggestions below the table). <b>Second</b> , insert supporting teaching strategies that fit and align with the assessment methods and intended learning outcomes. <b>Third</b> , insert appropriate assessment methods that accurately measure and evaluate the learning outcome. Each course learning outcomes, assessment method, and teaching strategy ought to reasonably fit and flow together as an integrated learning and teaching process. (Courses are not required to include learning outcomes from each domain.)

## G Course Evaluation and Improvement Processes

1 Strategies for Obtaining Student Feedback on Effectiveness of Teaching  Not available. If a teacher requires feedback, it would be through the teacher's personal effort and means of obtaining the feedback.
2 Other Strategies for Evaluation of Teaching by the Instructor or by the Department  Not available
3 Processes for Improvement of Teaching <ul style="list-style-type: none"><li>• Annual teaching workshops provided by Oxford University Press to staff members in both the male and female sections.</li><li>• Internal workshops provided by experienced ELC staff members on various topics related to teaching and assessment.</li></ul>
4 Processes for Verifying Standards of Student Achievement (e.g. check marking by an independent member teaching staff of a sample of student work, periodic exchange and remarking of tests or a sample of assignments with staff at another institution)  Unified mid-term and final exams consist of multiple choice items and are machine-corrected to ensure score reliability
5 Describe the planning arrangements for periodically reviewing course effectiveness and planning for improvement.  Online surveys developed by ELC administration to collect feedback from staff members on the effectiveness of the curriculum used and the strategies implemented
