Abstract

At present, sports academics need a special program of their own to facilitate the process of communication between parents and the academy. Daily videos, follow up on his son's progress and know the joint offers
Our goal is to create a program that is clear to use and has beautiful and simple interfaces that make it easier for all ages to use the program.

Objective

- unique step for sports academies.
- Follow up on photos and videos daily.
- Follow up on the subscriber's progress every
- Possibility to purchase from the academy store.

Related Works

There are applications for educational or cultural academies.
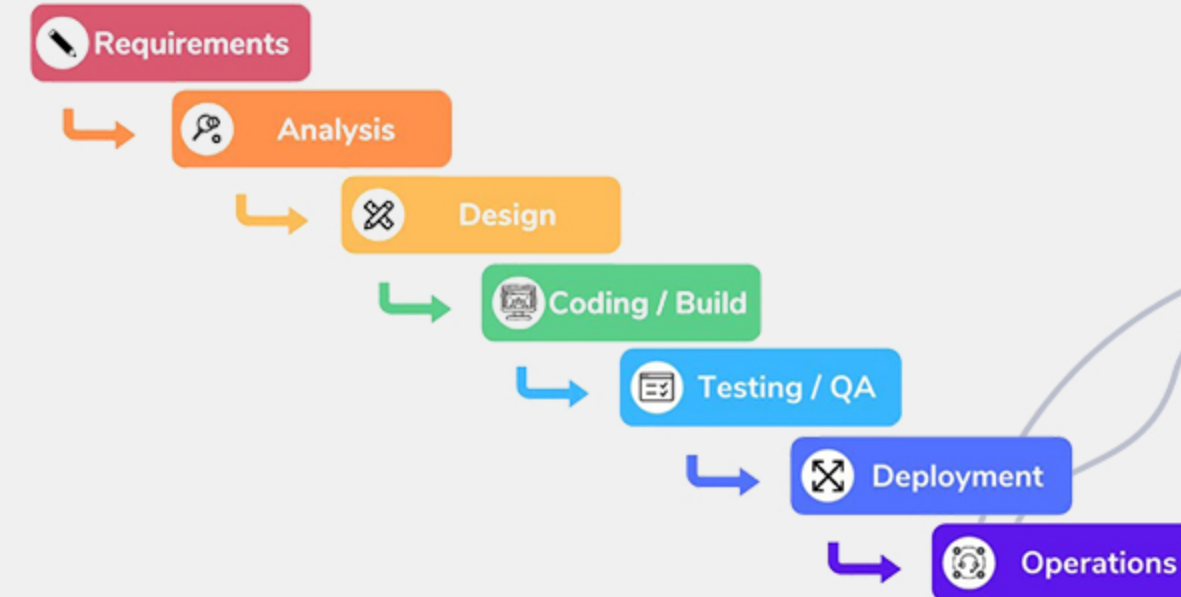

Problem

no sports academy offers the idea of the application

According to our research, no sports academy offers the idea of the application. and for this we wanted it to be a new idea and the first of its kind in the world of sports academies.
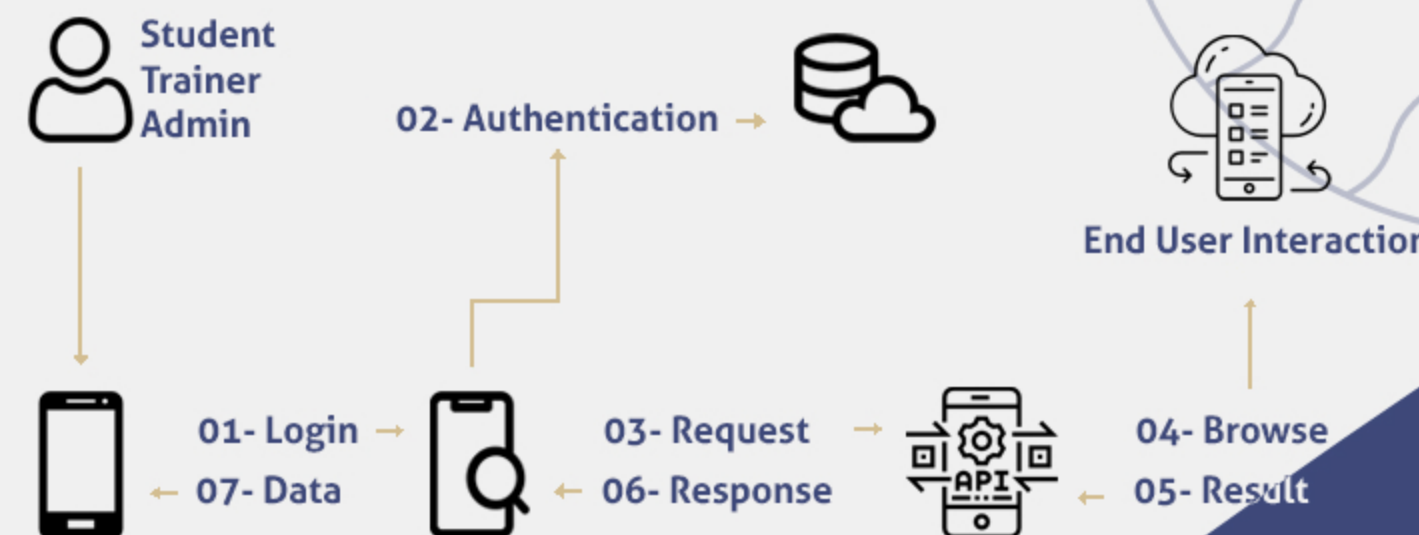

Methodolgy

- Requirements
- Analysis
- Design
- Coding / Build
- Testing / QA
- Deployment
- Operations

Prototype

Student
Trainer
Admin

02- Authentication

End User Interaction

01- Login
07- Data

03- Request
06- Response

04- Browse
05- Result

API

Tools

Android Studio | Flutter | Dart | FireBase

Result

- Security
- Immutability
- Transparency
- Availabilty

Conclusion

The application will make it easier for students to follow the news by following up on photos, clips, news, assessments, and attendance. It will also help officials in managing and helping to spread the largest possible

Future Work

01 Adding online payment methods for the system.

02 Building against more platforms like IOS and Windows phones.

03 Adding Arabic interfaces.
