

Hold My Hand

Bayan Alharthi, Roaa Alayaafi, Manar Khamees, Nawar Alhazmi, Yasmin Alkaddour

UQU-CS-2022S-05

Supervised By: Dr.Reem Al Ashaikh

Computer Science Department-Umm Al-Qura University- Makkah - KSA.

1 Introduction:

The application helps children with autism to express their feelings, learn how to communicate with others, and learn emotional faces. Beside that, The target group is children with Kanner autism. The application will deal the user according to his gender.

2 Problem:

Children with kanner autism have trouble understanding or expressing their feelings and have difficulty communicating with others.

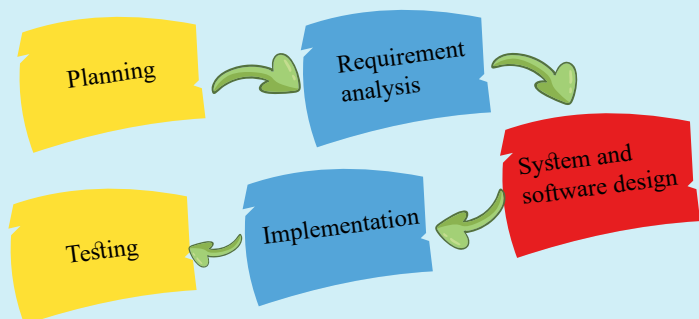

3 Solution:

We worked on creating an application to solve this problem, where contain two activities which help them to learn some emotional aspects and how express their feelings, communicate with others.

4 Main Objectives:

- Helping the child with autism to express their feeling.
- Helping the child with autism to communicate.
- Helping the child with autism to understand.
- Application is created in Arabic.

5 Methodology:

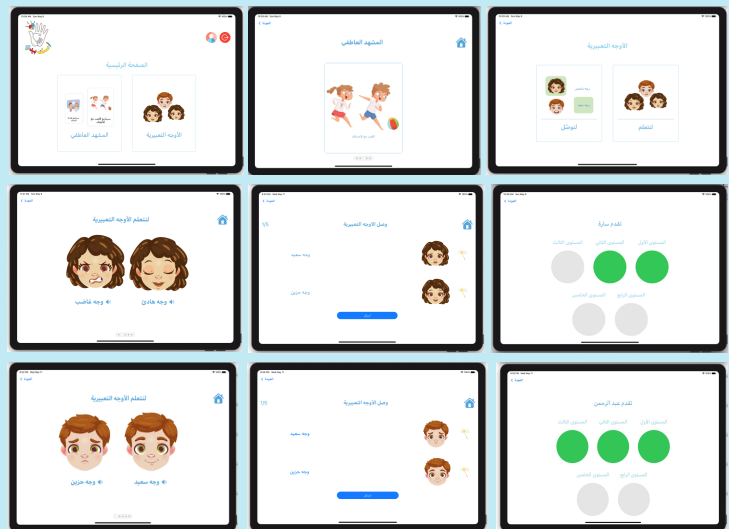

6 Development Tools:

7 Feature Work:

- Increase the number of levels in expressive facial match.
- Increase the number of scenarios.
- Add cards section.
- Add the educational videos section.
- Add a picture puzzle section.

8 Application Interface:

9 Conclusion:

Hold my hand application helps to facilitate the process of teaching autistic children to express their feelings and learn expressive aspects through images and sounds, the program was built, applied and tested.
