INTRODUCTION

Introduction: Mercy is a benign characteristic of human nature, especially if you spend this good line for a soul that does not speak like an animal, 10 people own at least one pet, but they find it difficult to understand the needs of the pet , and find it when lost in an easy and safe way, we chose to create a model that brings the two together, as a model developed for pet owners.

MOIVATION

Some pet owners tend to set up accounts on websites to book a veterinarian or consulting	Some veterinarians tend to create social media accounts to advertise themselves.	There are many good, unknown veterinarians.	There is no platform that enables pet owners to communicate with other pet owners to increase news

AIMS AND OBJECTIVES

- Create a website for pet owners to provide services and facilitate their communication with veterinarians
- Provide a service to pet owners to make it easier to find a missing pet

METHOD APPROACH

- waterfall method

DEVELOPMENT TOOLS

PHP MySQL Visual Studio
XAMPP phpMyAdmin

PROPOSED SOLUTION

Provides consultation with a veternarian

Provides communication with site users

barcode Provides to find the missing pet

Provides an appointment with a veterinarian

HOW THE WEBSITE WORKS

vet — notification entry page

sign in

appintments entry page

user — connect with users

pet owner — notification page

barcode page

appintments booking page
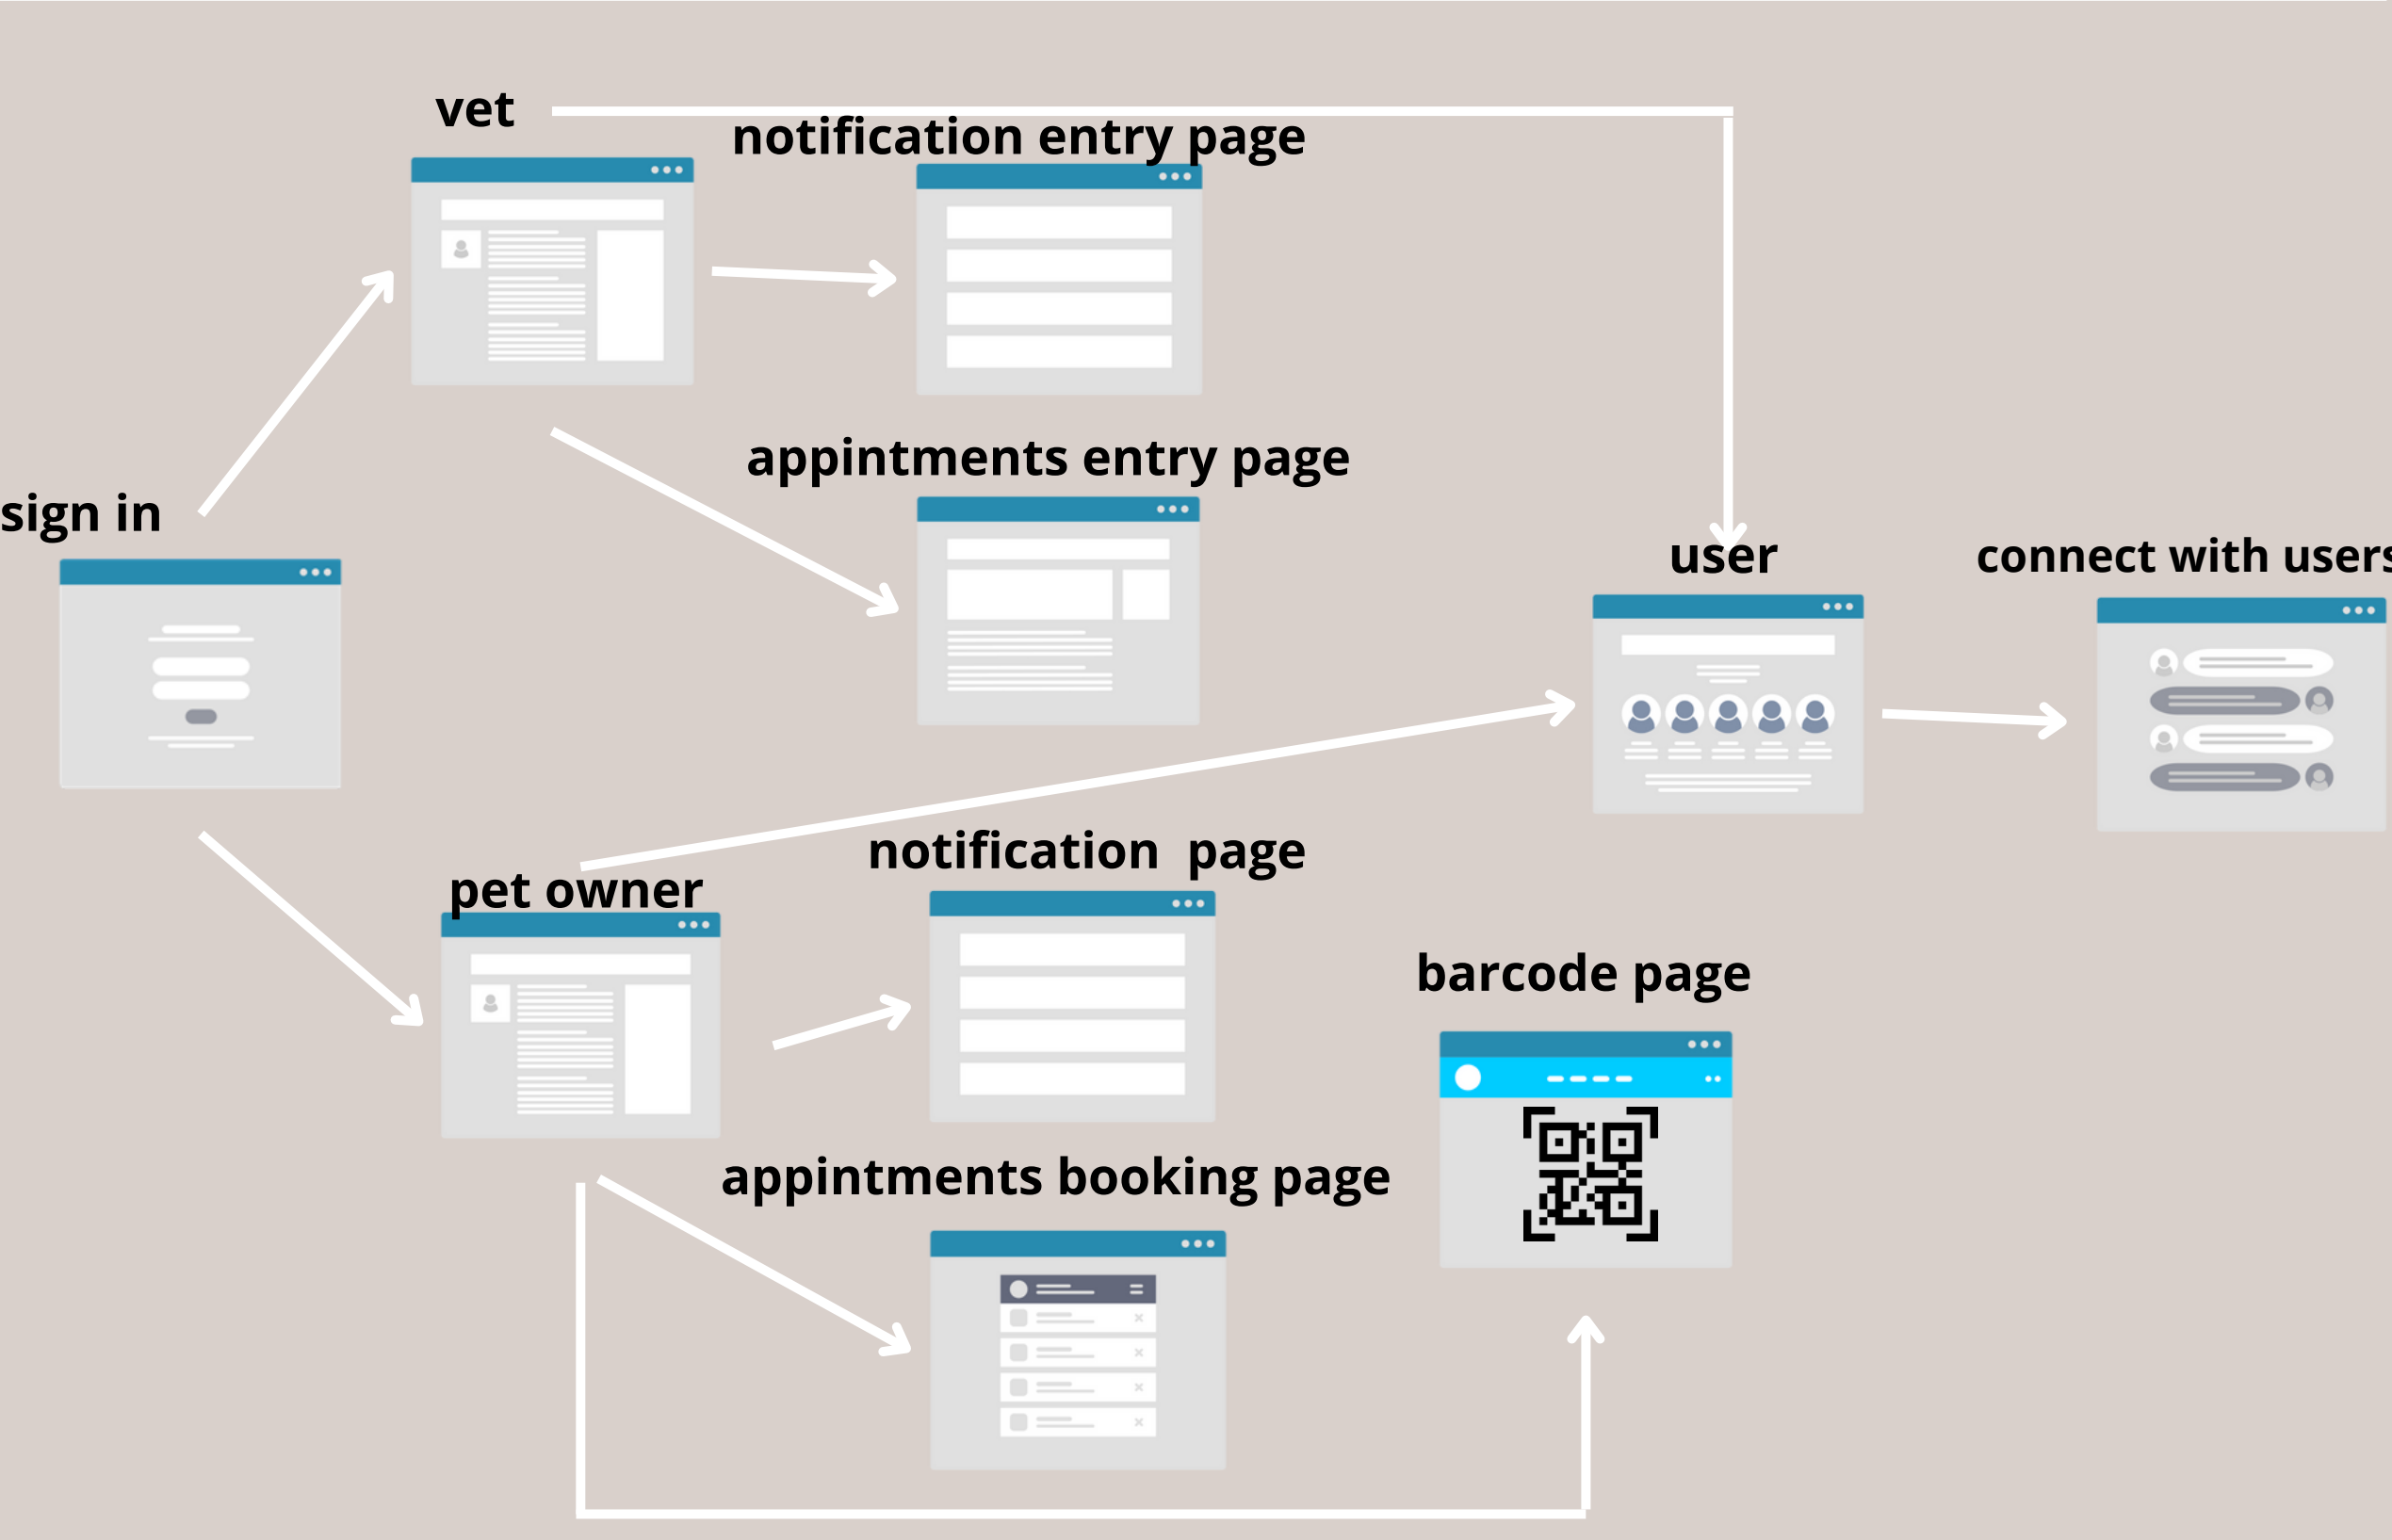

CONCLUSION

Bottom line, we're a multi-interface site, we're going to make it a future valuable app on Android and IOS devices, and there's going to be a lot of extra features on the site,
There will be a service to sell pet accessories , and also evaluation of vet , and a list of famous clinice
