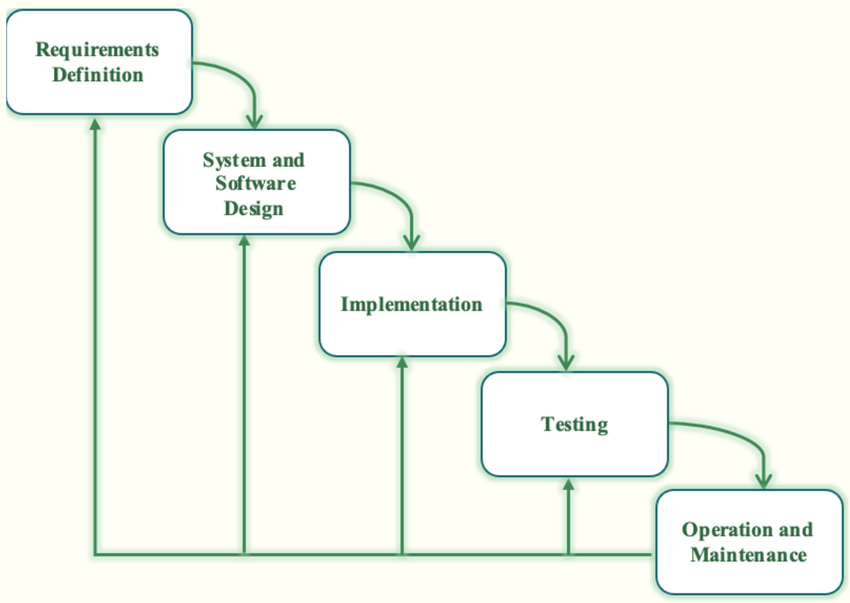
- Usable Design.
- Reduce the Complexity.
- Better Crowd Management.

METHODOLOGY

Waterfall Model Software Development



DEVELOPMENT TOOLS

Adobe XD

Xcode

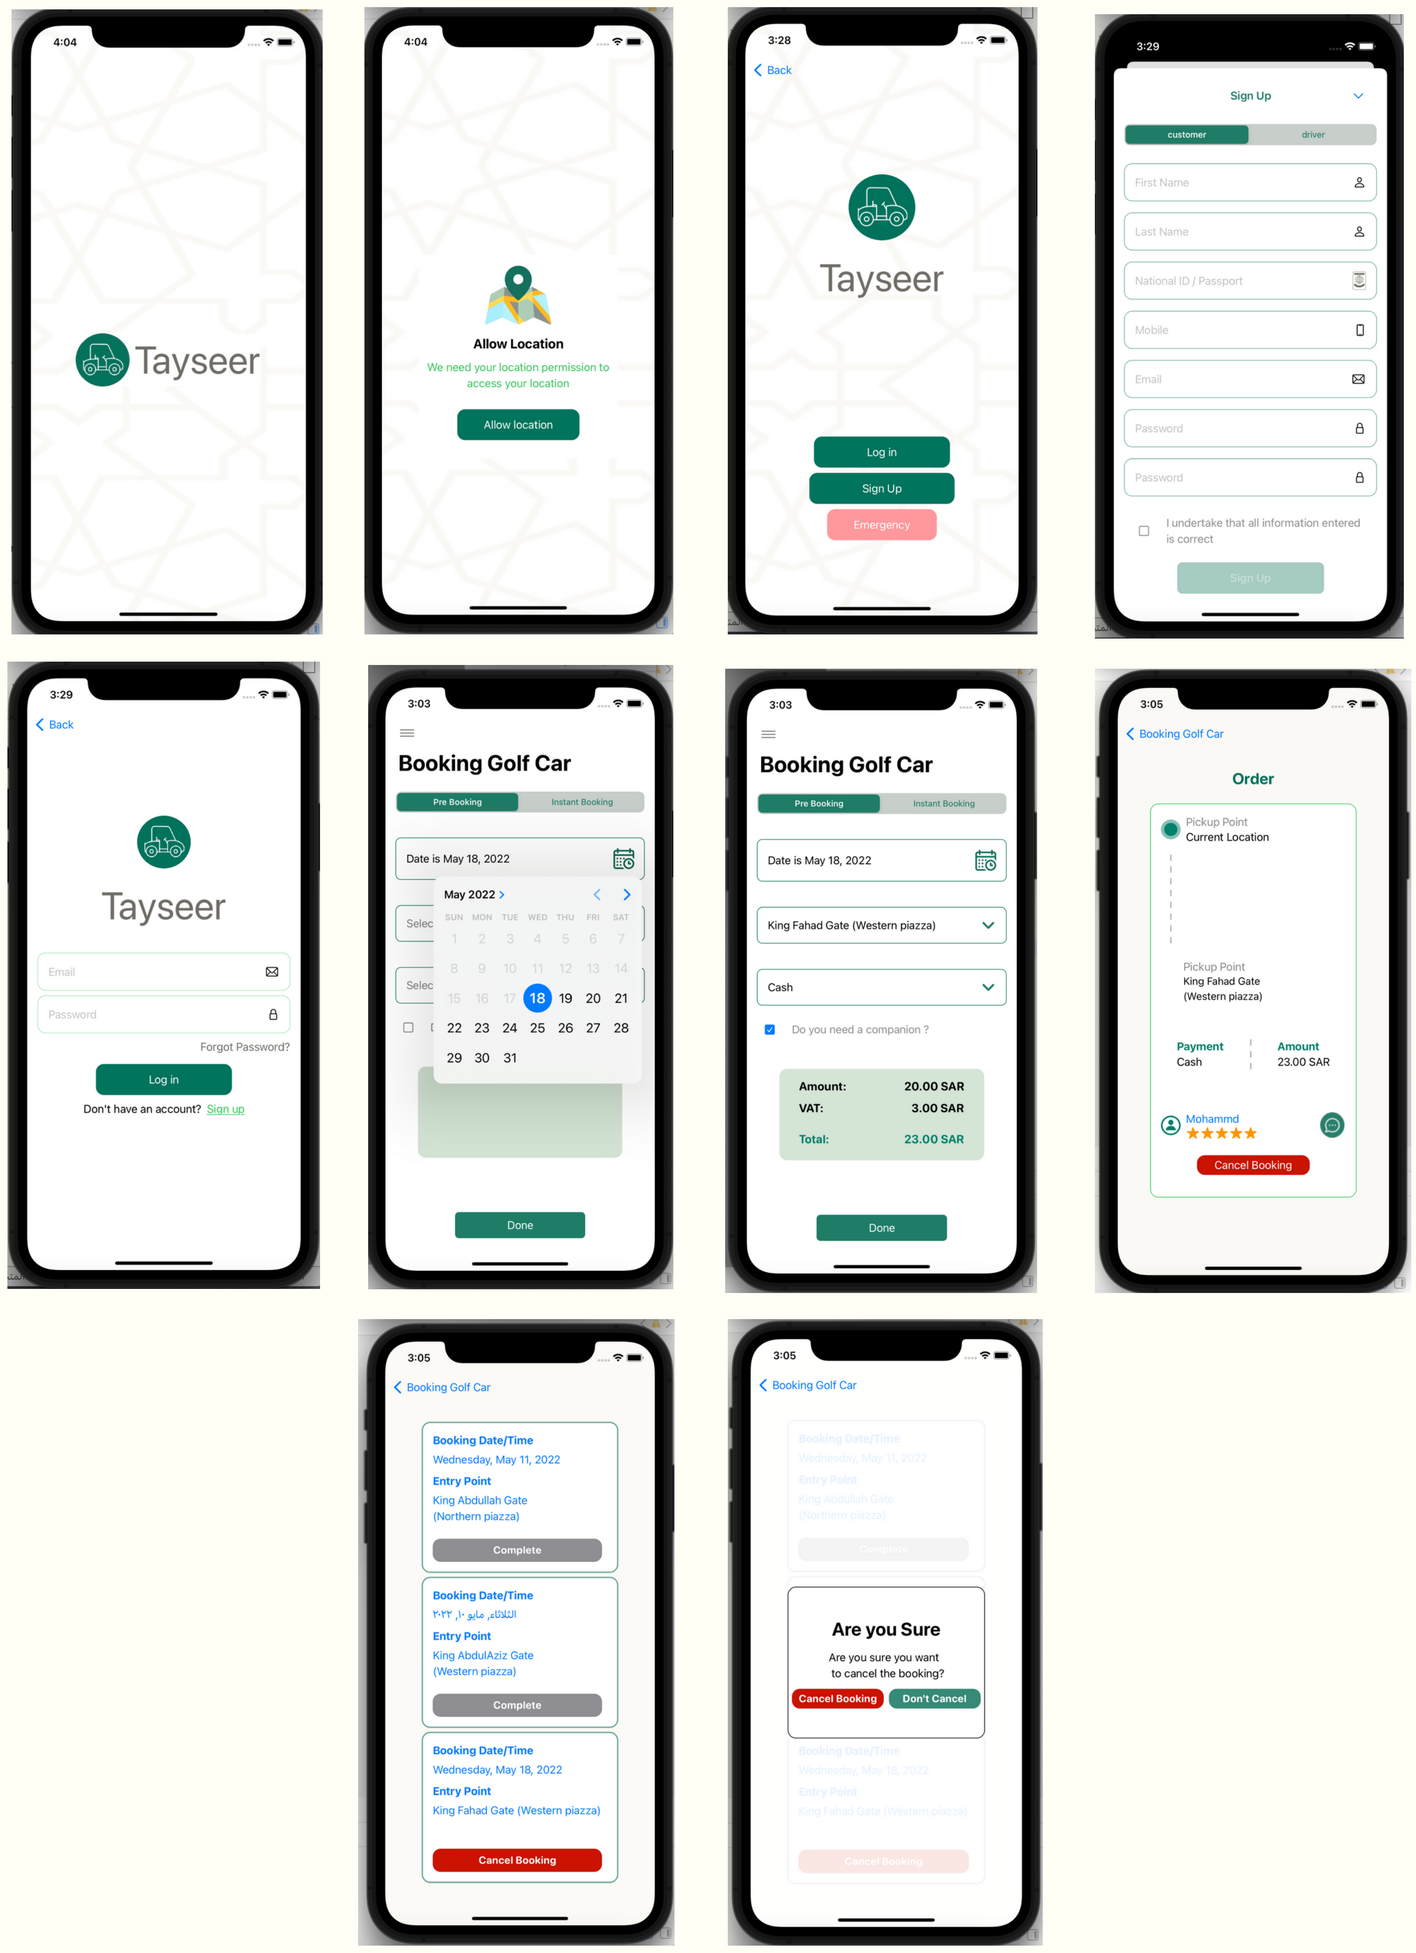
SwiftUI

Firebase

Lucidchart

draw.io

RESULTS



CONCLUSION

Despite the growth of this business in Saudi Arabia, there is still a lack of this growth for several reasons. So our application came to fill this gap as it aims to cover the outer area of the Haram to receive and drop pilgrims and visitors to and from the main gates and contribute to helping elderly and disabled visitors in the transportation service, which will be managed through the application, directly and seamlessly technology without the need for centers to obtain tickets only device, internet and free subscription.
