Information System Department, Umm Al-Qura University, 2022

## Introduction

Cooperative training is the training that provided by educational institutions in cooperation with companies and state institutions. The importance of cooperative training is due to the fact that it helps both the trainee and the practical and educational institutions to communicate and work to provide trainees that can help in developing the workflow . many students, and training applicants suffer from many problems searching for agencies that offer training opportunities, on the other hand, government agencies and companies face difficulties in finding suitable trainees. Our project helps solve these problems, by presents trainings opportunities whether for cooperative training that end with employment or student's, to apply for the right opportunity from the offered opportunities.

## Aims and Objective

- 1-Introducing graduates to the various training providers to increase their experience and increase their access to job opportunities in the same place of training
- 2-Introducing government agencies and private companies to those qualified applicants
- 3-Raising awareness of the benefits of training to increase the experience of students and graduates and prepare them for the real work life

- 3-It provides flexibility for the registered company to view applicant's profiles to choose the appropriate applicant according to the company's needs, to send him a training request

## Development Tool

## Conclusion & future work

we address the need in training systems including : students, and training applicants who have many problems searching for agencies that offer training opportunities, whether to complete their university plan requirements or to gain experience and search for jobs. On the other hand, government agencies and companies face difficulties in finding suitable trainees. create a platform dedicated to training opportunities, can end many problems, and save time and effort for those looking for training and the companies that provide the training. Also, it will help companies to create a more efficient and productive work environment.

## Acknowledgements

we are grateful and thankful for Allah then We would like to express our gratitude to our supervisor Dr. Daifallah Al-Sadie for his guidance to provide us with all useful information and making the path clear for the us to implement all project requirements
