

MY SAVING APPLICATION

My savings application helping to manage budget and save money for the students of Umm Al-Qura university

Ohood Alzahrani, Nada Almehdar, Khadijah Alhjjaji
Supervised: Dr.Ahad AL-jarf

INTRODUCTION

The available technology today can play an important role in simplification, Operations related to saving to strengthen solidarity among between students, banks, and the university to spread the culture of savings without deprivation, like major actions taken are on campus, to facilitate and simplify these procedures, one of the main tools is to have a financial system with an easy to use application.

AIMS & OBJECTIVES

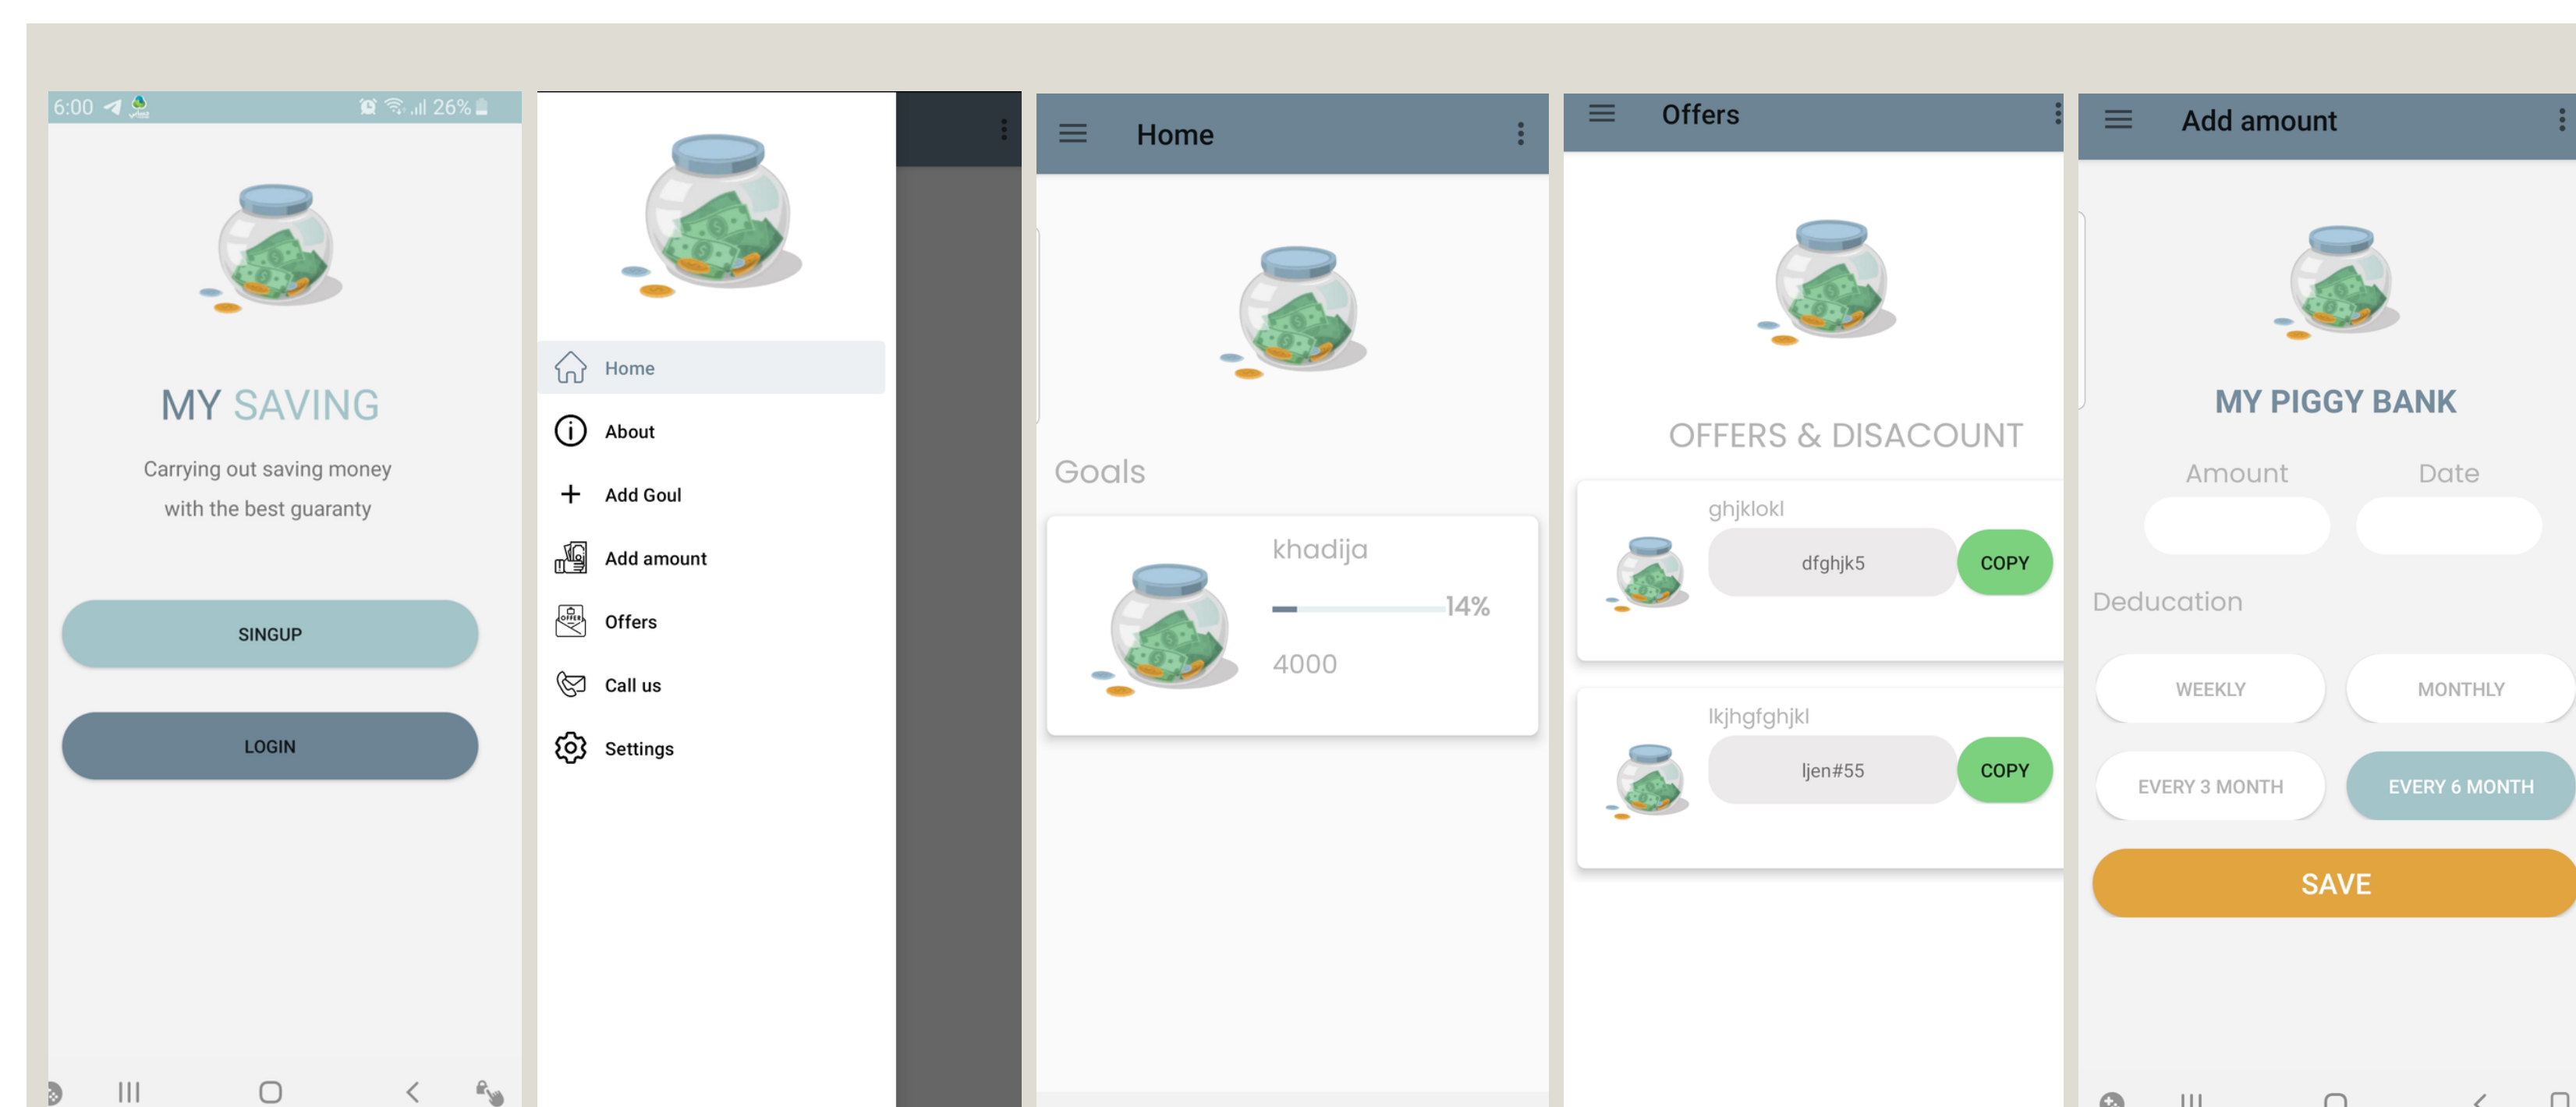

- Helping students manage money efficiently.
- Can freely control how much to save in any amount.
- It's free, secured just the way the bank is.
- Planning and saving for good spending.
- Provides piggy bank to save money.
- Daily notifications are sent to the students.

WORK

The system worked on Android platform, The application uses Firebase to store users data and it is linked with MYSAVING app

RESULT

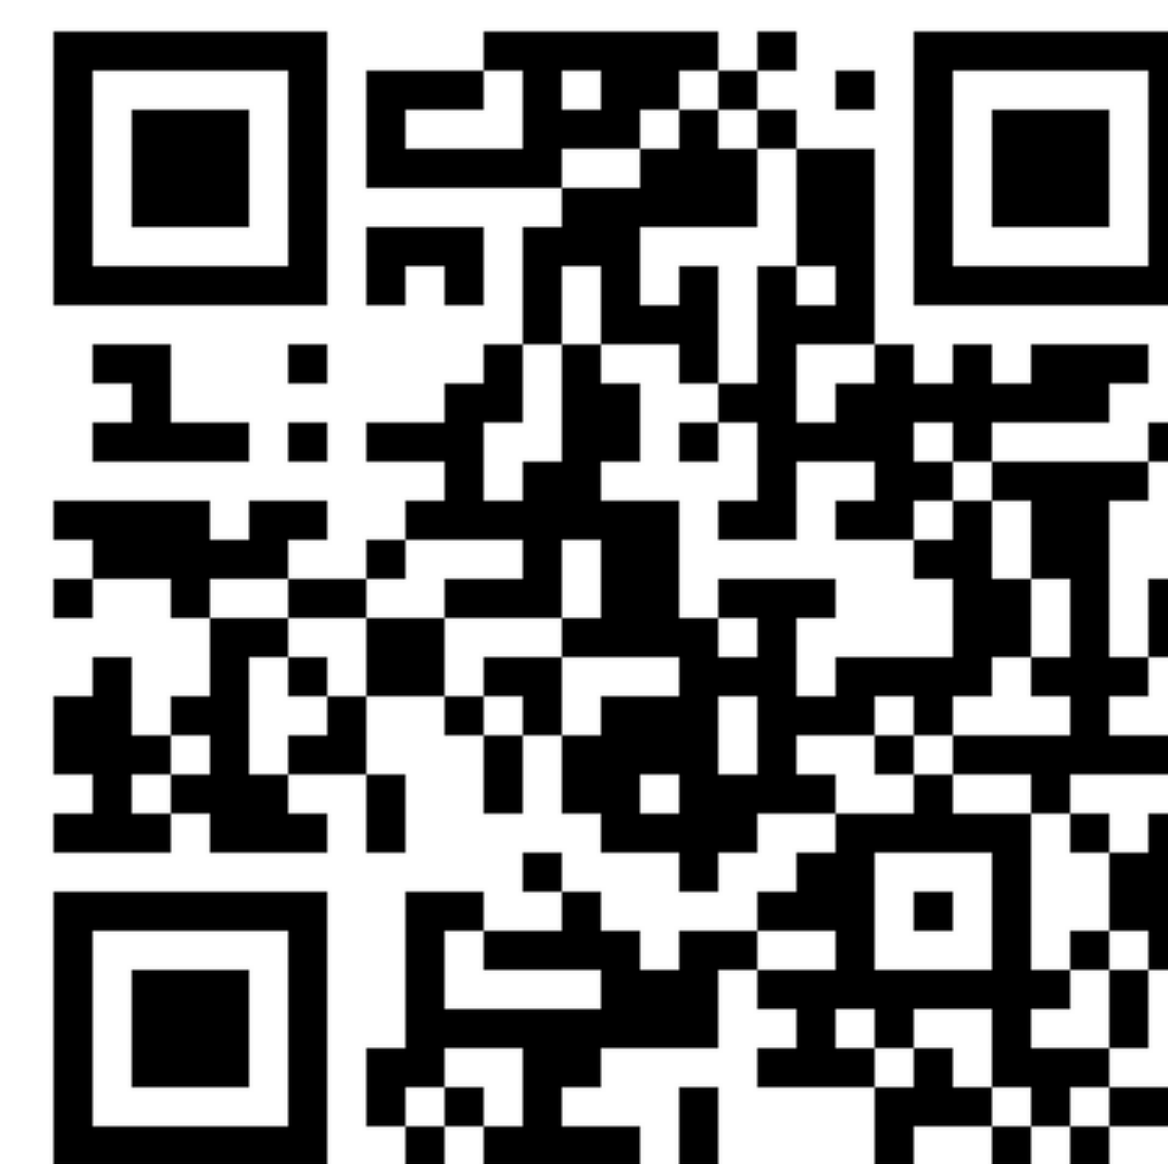

The final results of the MySaving application have been linked to adding money to the piggy bank with the creation of the goal, where the goal is achieved by 100% if the full amount of the goal is collected in the piggy bank, as well as the presentation of discounts and offers offered to Umm Al-Qura students.

CONCLUSION

A savings application that aims to help students save money to achieve goals according to a specific plan, which was developed through the Android Studio program using more than one tool and is linked to the Firebase database. It was run and tested by downloading it on Android phones
