Introduction:

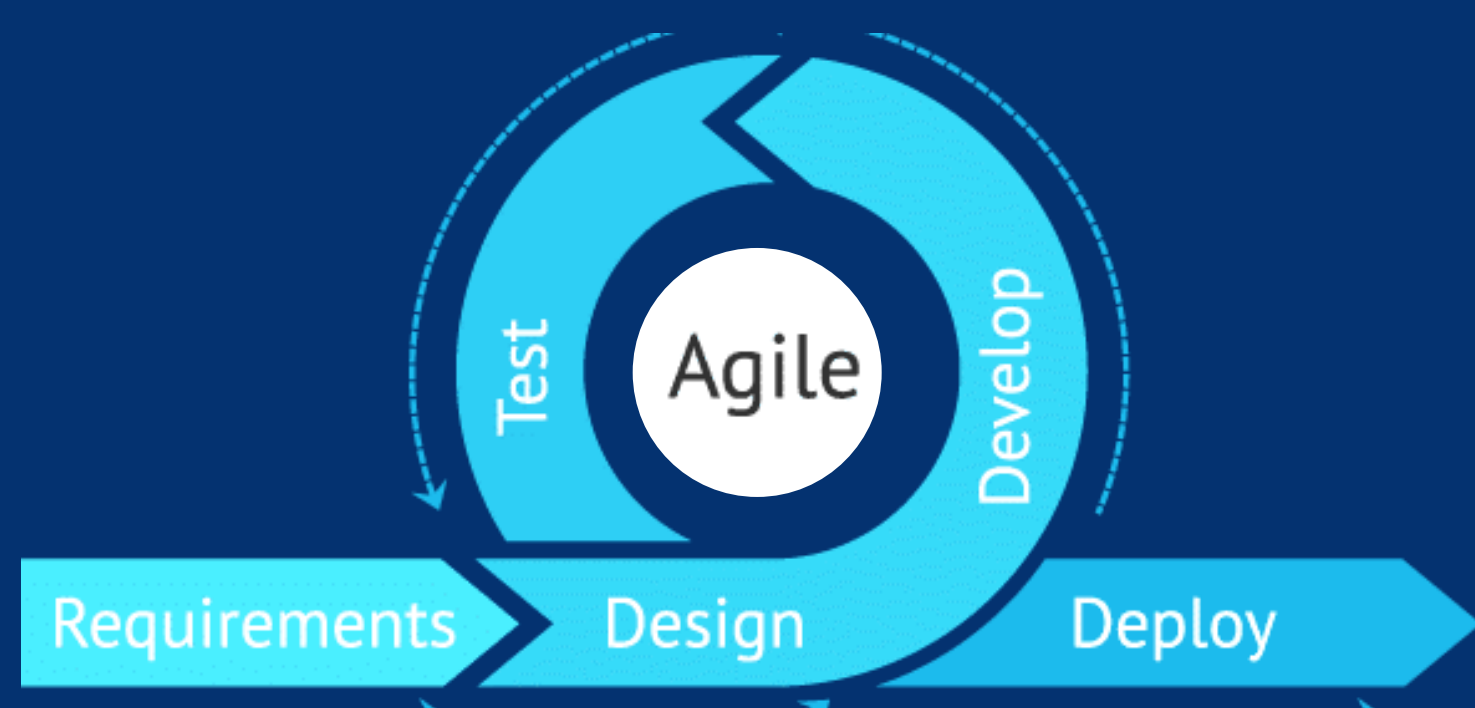

Many people face problems in their daily life and seek assistance or guidance in finding the best solution. We will help them find a good attorney they can trust for their cases and communicate with them to find a solution through our project "protect you/نَحْمِيكَ" mobile application.

Project objective:

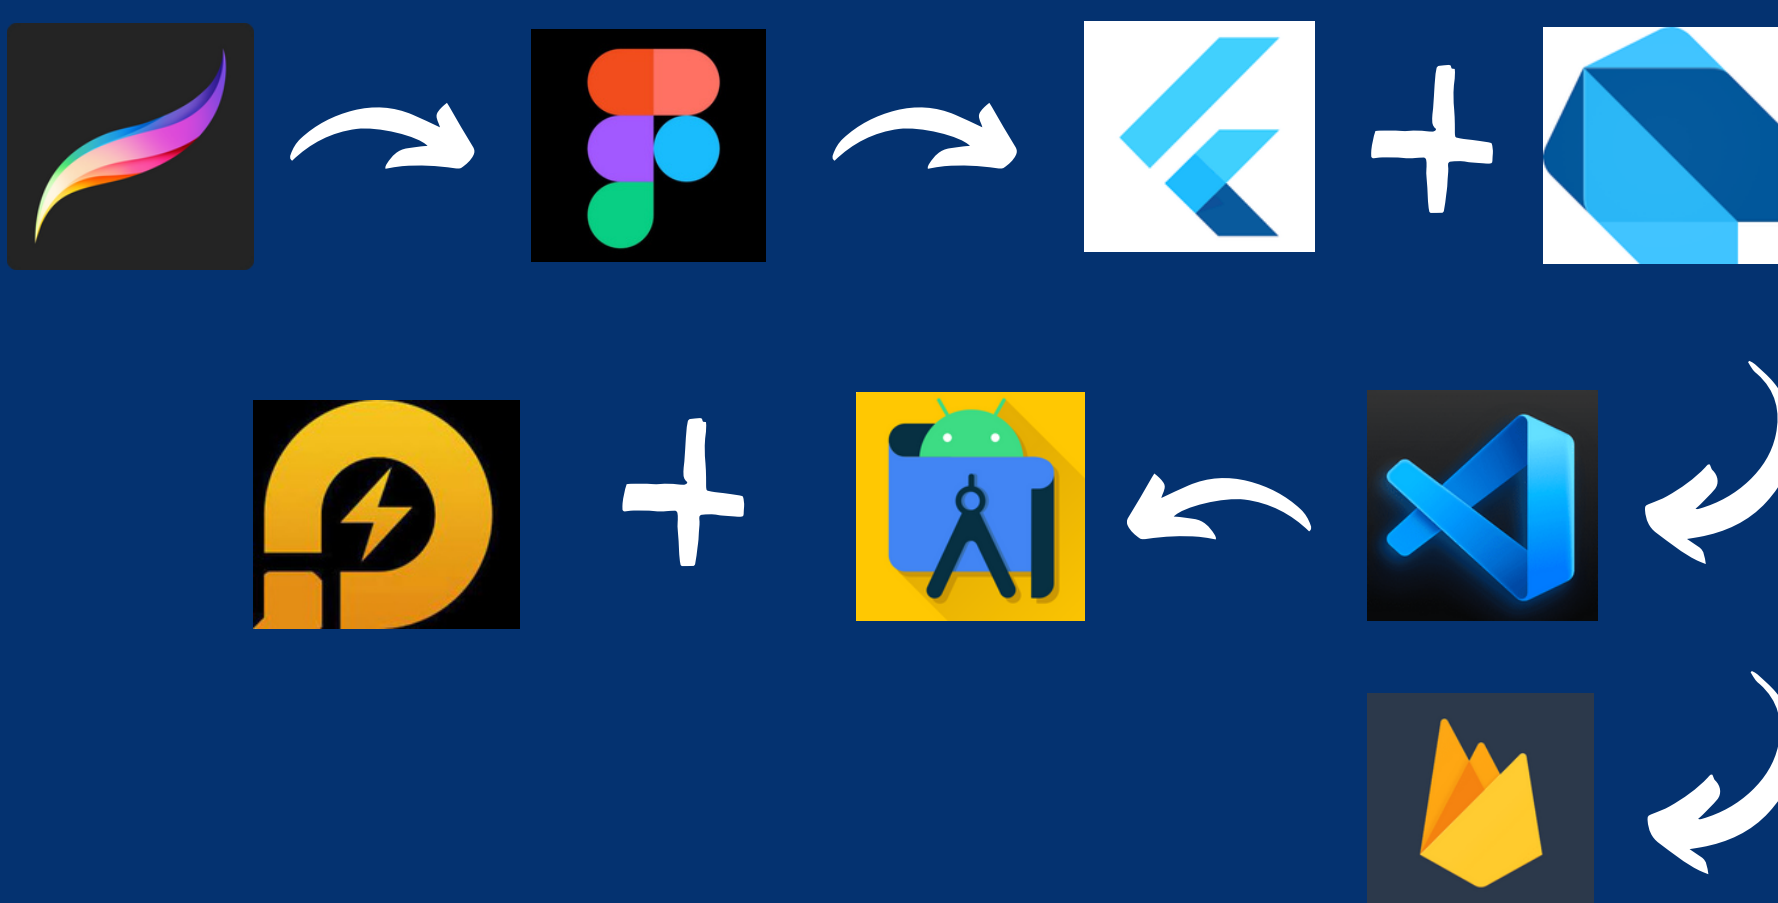

- Providing a convenient way to locate qualified attorneys.
- Creating an environment where attorneys can offer their services and help people.

Project methodology:

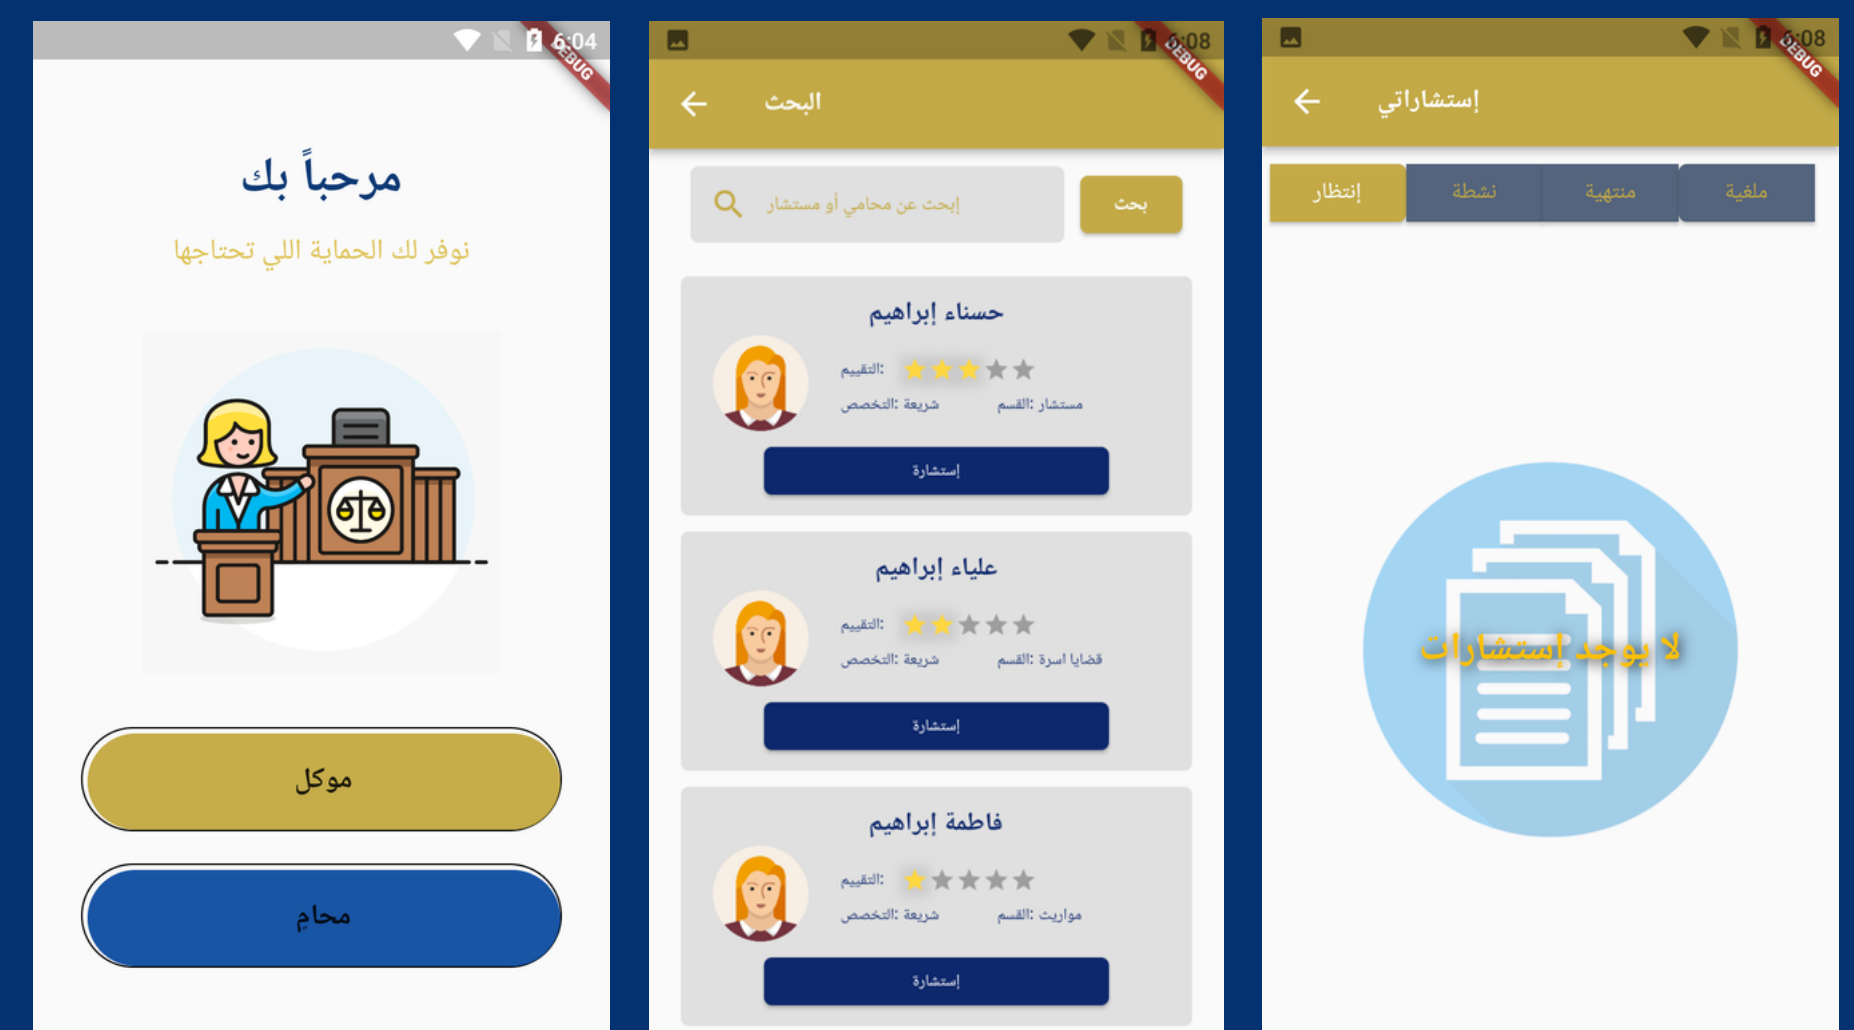

We use Agile methodology in our project, which allows for parallel development and testing.

Results:

Summary:

Finding the right attorney for people who may face many legal problems and have some complex cases has become easy. With a mobile application at hand, individuals can access good attorneys all the time and in all different cases.
