ABSTRACT

Sallati solution will convert normal shopping carts into smart shopping carts by installing a fully customizable component based on stores specifications from a range of tiers, and it can be implemented in any and every shopping cart.
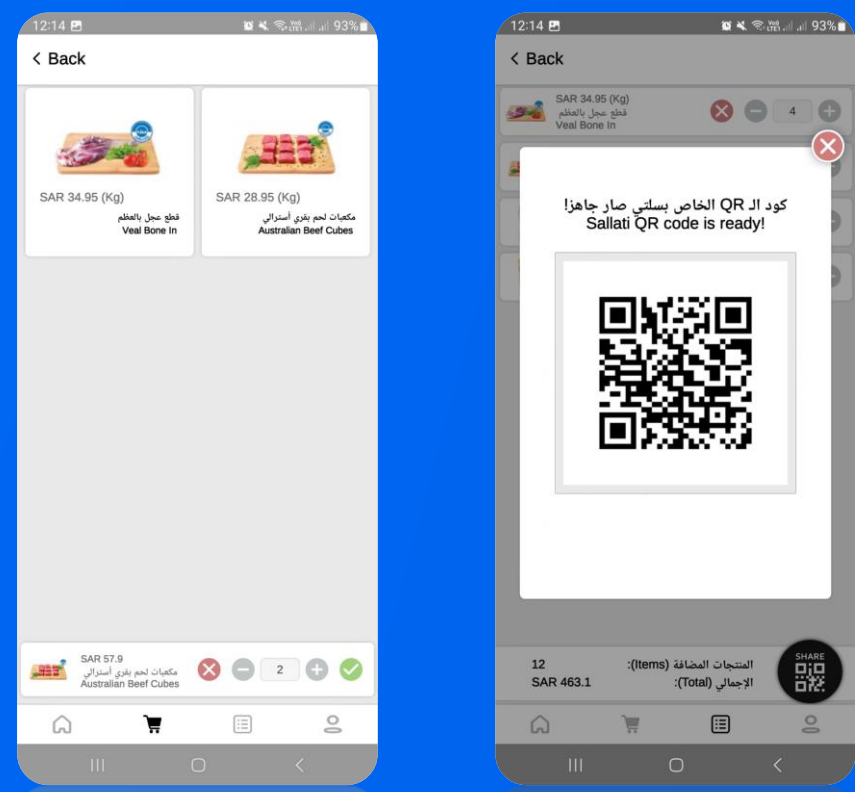

It also helps enhancing the customer experience, allowing customers keep track of their budgets, check product prices, and more, all to ensure an excellent, enjoyable, and convenient shopping experience.

Methodology

- Ideations
- Requirement
- Analysis
- Design
- Build
- Monitor
- Deploy
