Supervised By: Mourad Salah Mars

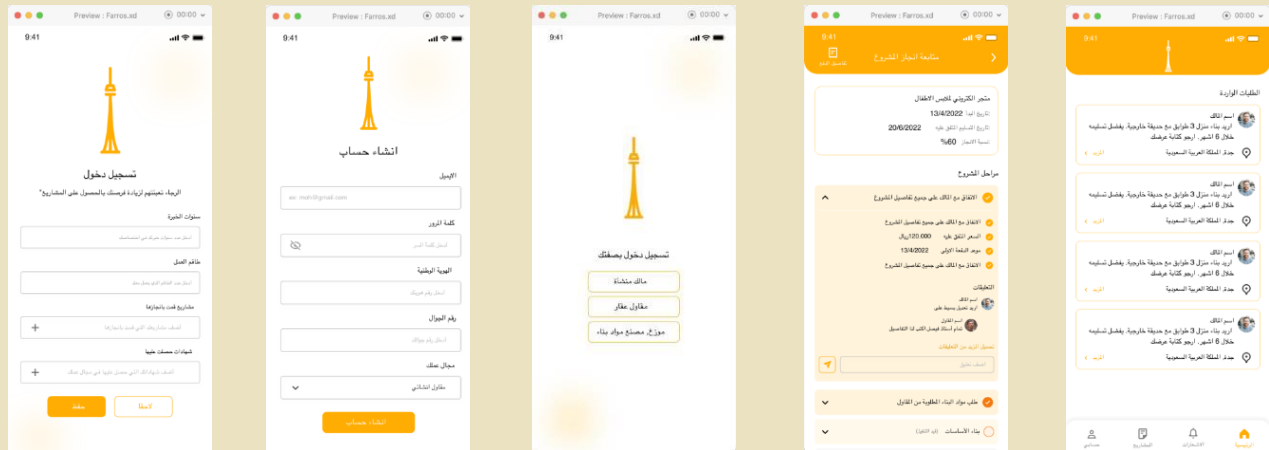

## Introduction:

We are proposing an application that will mainly benefits owners in their construction plans. We are providing here an easy way to finding contractors that will satisfy their needs by offering lists of (contractors and their classifications, construction materials, prices and other services).

## Product Scope:

Our proposed application aims to provide many services to the owners of small to medium size businesses, including: contractors selection, price comparison, projects follow up and many other related services that are missing in the current applications and platforms.

## User Interfaces:

## Tools:

## Contact US

We thank Allah, then **D/ Mourad Mars** who, helped us with this project, without his support, and guidance it wouldn't have been possible.
