ABSTRACT

Since Health is an essential factor in an individual's life, medical applications have become very popular. They provide a quick and easy service at anytime and anywhere, since many patients need help to adapt to their illnesses, the Health E-club mobile application helps them manage their illnesses, it includes the essential features that are available in useful health applications.

METHODOLOGY

FUTURE WORK

Support more languages.

Patients can book a clinic appointment.

Facilitate its use by People with special needs.

Parents can add and book appointments for their children's.

CONCLUSION

Health E-Club is an application that facilitates patients' treatment journey through the services it provides, and its main goal is to help patients cope and exchange experiences with the other people, and this is what we aspire to do.
