INTRODUCTION

Our project focuses on identifying tourist attractions and events in the Kingdom of Saudi Arabia, highlighting them to tourists, and evaluating them based on user experience.

RELATED WORK

Comparison Criteria	Google Travel	Tourist	Visit Saudi	Top Place
Search For The Best Place	✓	✓	✓	✓
Ranking the best place based on user evaluation				✓
The user can see the best places in the city where he is		✓	✓	✓
Ability to interact and respond to users' reviews	✓			✓
Ranking of the best places based on the type of category				✓
View favorite and visited places in a user's profile	✓		✓	✓
Evaluation of the place visited	✓			✓
Highlight the best places based on the rating				✓
View the top recommended places about the area	✓	✓	✓	✓

METHODOLOGY

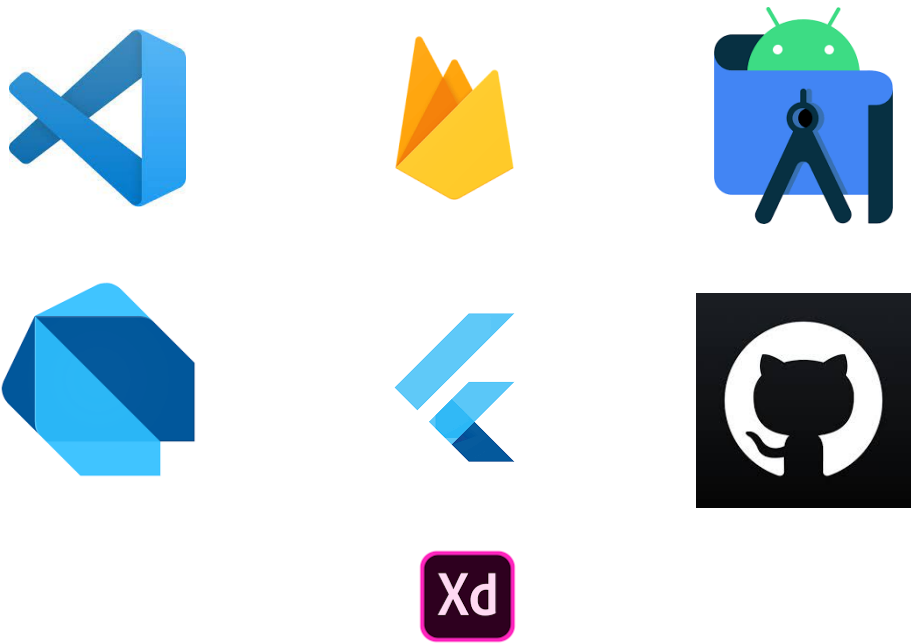

AIMS AND OBJECTIVE

We want to design a tourism app that highlights the best tourist destinations in the region based on the user experience in an interactive way by evaluating the site, displaying the most prominent dedicated events, and sharing its feedback with users

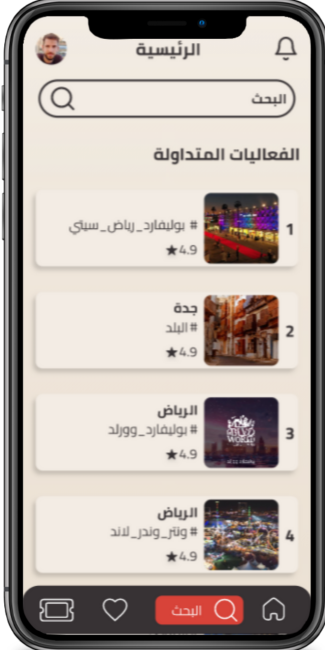

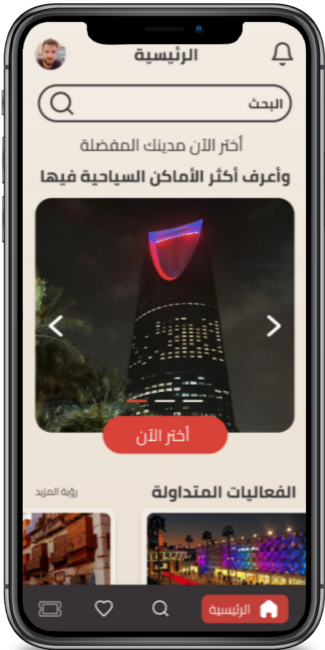

FUTURE WORK

- Add more than one language to the app
- Add a voting option to improve tourist places in Saudi Arabia
- Add a hotel booking page in the app
- Add a feature to schedule the trip
