Information System Department, Umm Al-Qura Universty

introduction

We are Umm Al-Qura University students who use buses. Unfortunately, we encountered some problems and tried to solve them in our application to facilitate the use of university buses for students.

Project Goals

Developers find a good way to save effort and time for students by developing some features in our app as follows:

- Follow the bus route.
- Find out what time buses leave and return to the university.
- The possibility of requesting the bus at specific times.
- Alert notifications.
- Make a complaint.

Benchmark for existing applications and our application:

The similar App	OUR BUS	Makkah bus	Busway	Abu sarhad
Boarding bus	✓	✗	✓	✓
Bus tracking	✓	✓	✗	✗
Bus boarding barcode	✓	✗	✗	✗
complaints	✓	✓	✗	✗
Add supervisor to the driver	✓	✗	✗	✗

tools:

android studio

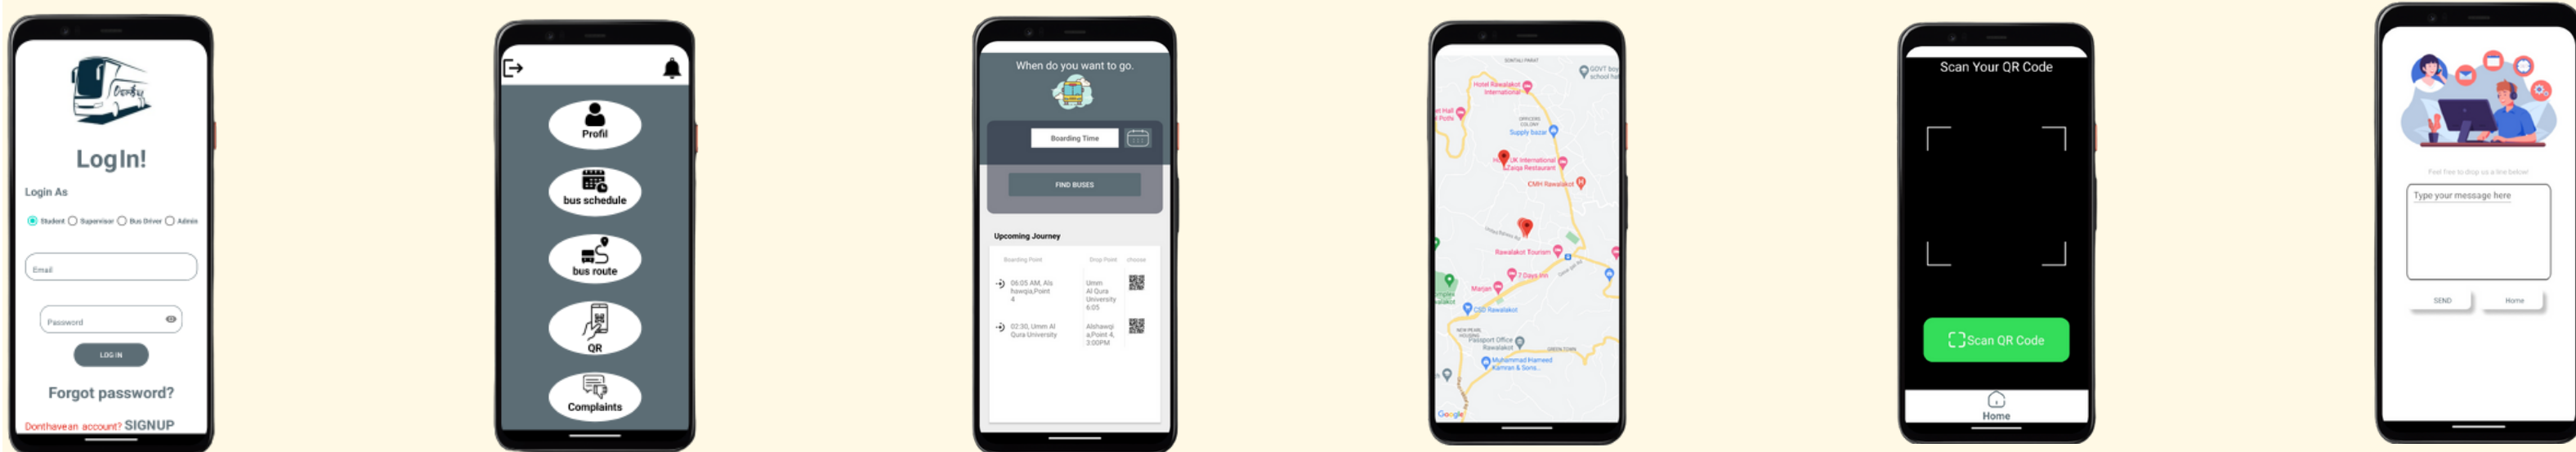

firebase

OurBus interfaces:

CONCLUSION

Designing a comprehensive application familiar with the bus to help students and supervisors of the university bus and drivers deal with each other to support the university bus services to make it more distinctive, befitting our university and motivating our students to register and use it.
