UMM AL-QURA UNIVERSITY

INTRODUCTION

This website aims to improve the learning experience of university students by facilitating communication between them and excellent university students who serve as tutors. The website offers a platform where both students and tutors can create accounts and interact with each other. Students can book tutoring sessions with a tutor of their choice by selecting the relevant course and providing a video sample to explain their needs. This service aims to enhance the student's understanding of course material and help them achieve academic success.

OBJECTIVES

- 1- Help the student to understand the difficult subjects
- 2- Easy access to the information, at any given time
- 3- Financial income for excellent students
- 4- Easier communication of information among students

FUTURE WORK

- The system will be improved with additional features such as:
- Add Arabic language to the website
 - Get notifications for newly added courses.
 - Build an admin control panel to manage all website users.

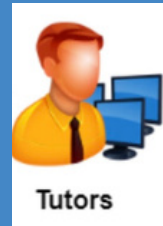

CONCLUSION

The Help Up website is really helpful for students. It makes it easy for students to find good tutors, and it helps them choose the right one. This website also makes it easier for students to talk to their tutors and get personalized help. This will help students understand their schoolwork better, do well in their studies, and keep loving to learn. In the changing world of education, websites like Help Up are adjectives for giving every student a chance to succeed.
