Abstract

In Saudi Arabia, hiking enthusiasts face a significant challenge due to the absence of a dedicated app for trail information, trip planning, and fostering community engagement. The current resources available, such as websites and Instagram accounts, are fragmented and fail to provide adequate support. This lack of centralized resources impedes efficient planning, access to trail information, and the establishment of a thriving hiking community. Our project aims to address these challenges by developing a user-friendly hiking app that provides essential features, including trail information, maps, navigation tools, real-time weather, and a supportive community platform.

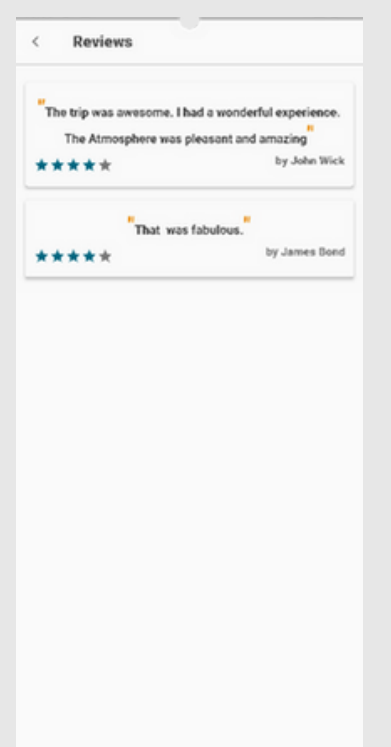

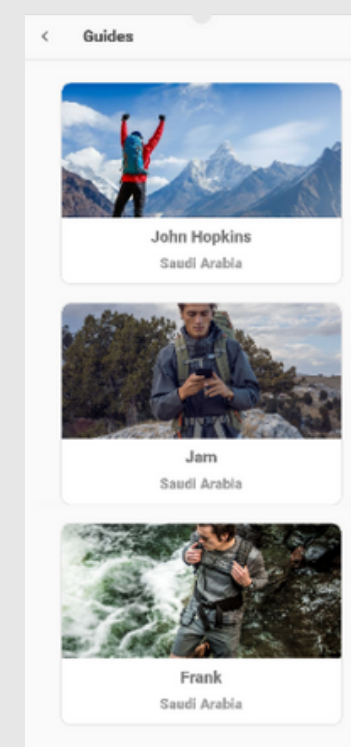

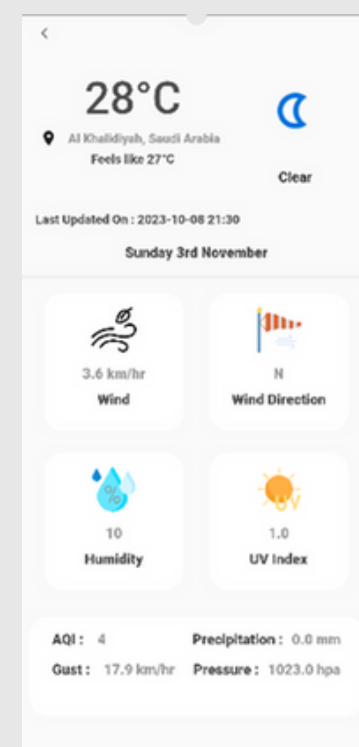

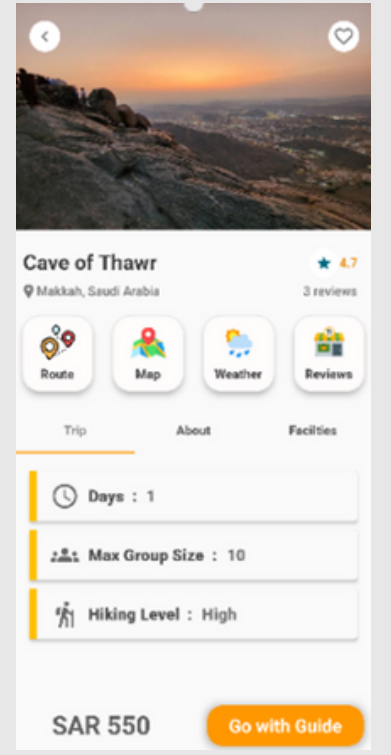

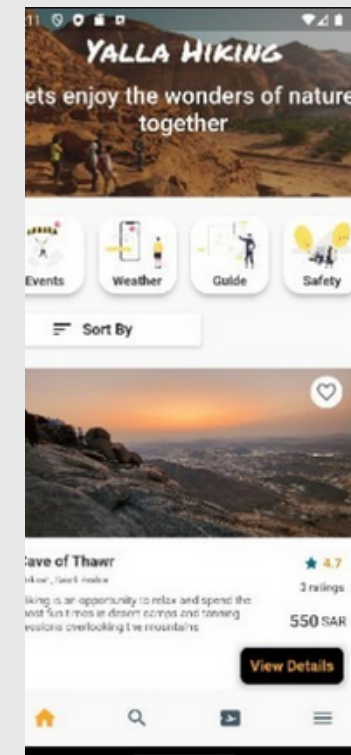

Aims and Objectives

- It contributes to strengthening your mental abilities more than other sports because it provides the brain with more oxygen-rich blood.
- Strengthening the relationship with others.
- Protect you from diseases.
- Improve your ability to balance.
- Increase user creativity.
- Burn more calories in the body .

Implementation tools

Interfaces

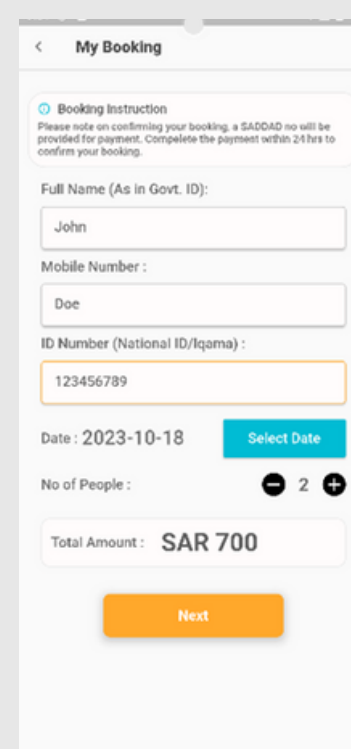

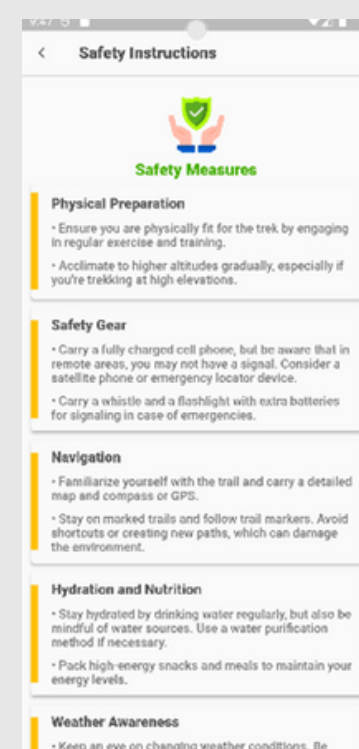

Innovations

- We're the first in Saudi Arabia to offer integrated Google Maps for hiking.
- Users can edit profiles and access trip history.
- Check seat availability and access safety info.
- Explore hiking places with photos, descriptions, supplies, ratings, and reviews.

Conclusion

In a world where technology is rapidly evolving, Yalla Hiking embraces the latest, advancements to cater to the growing community of nature lovers. The application not only helps you plan your routes and navigate the trails with ease but also ensures your safety by offering critical information such as weather updates and Safety instruction, Our app has the potential to significantly benefit the local hiking community, in our opinion. We can contribute to the promotion of hiking as a fulfilling and healthful sport by giving hikers the knowledge and resources they need to organize and carry out safe and enjoyable treks, we are thrilled to see how hikers in the area are using our app, and we eagerly await, user comments on how we can make it even better.
