

# Thaber system

College of Computing, Department of Computer Science  
Aseel Alnmari Renad Bakeet Roaa Klentan Elaf Alshanqiti  
Supervisor: Dr.Areej Al-sini

## Abstract:

Student' parents spend a significant amount of time searching for private tutors. "Thaber" solves this issue by providing parents with personal recommendations based on their preferences and needs, facilitating the tutor selection process.

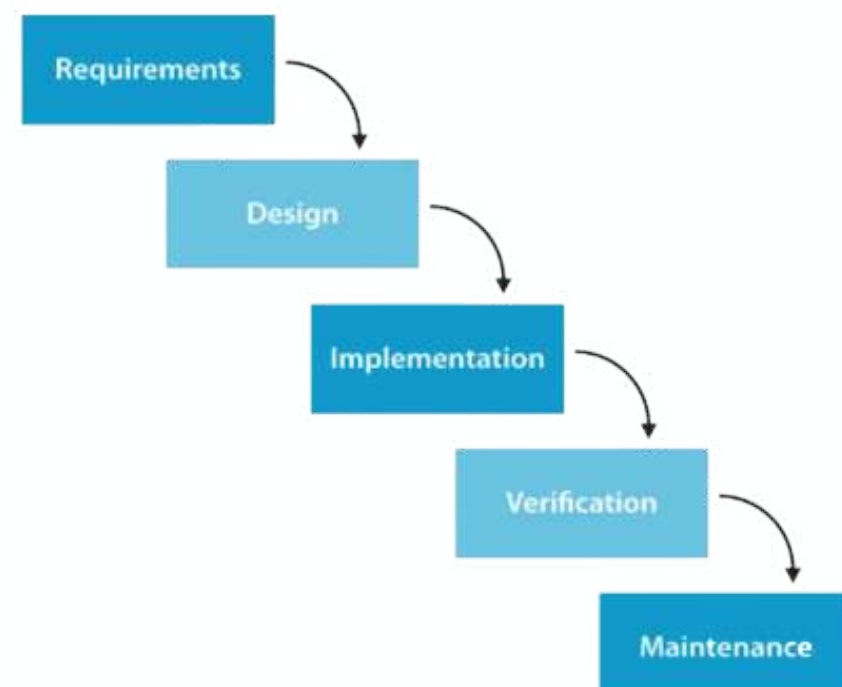

## Aims and objectives:

- Enhances the learning experience by connecting students' parents with the best tutors.
- Offers tutor recommendations based on students' parents preferences.
- Simplifies the process of finding and selecting private tutors.

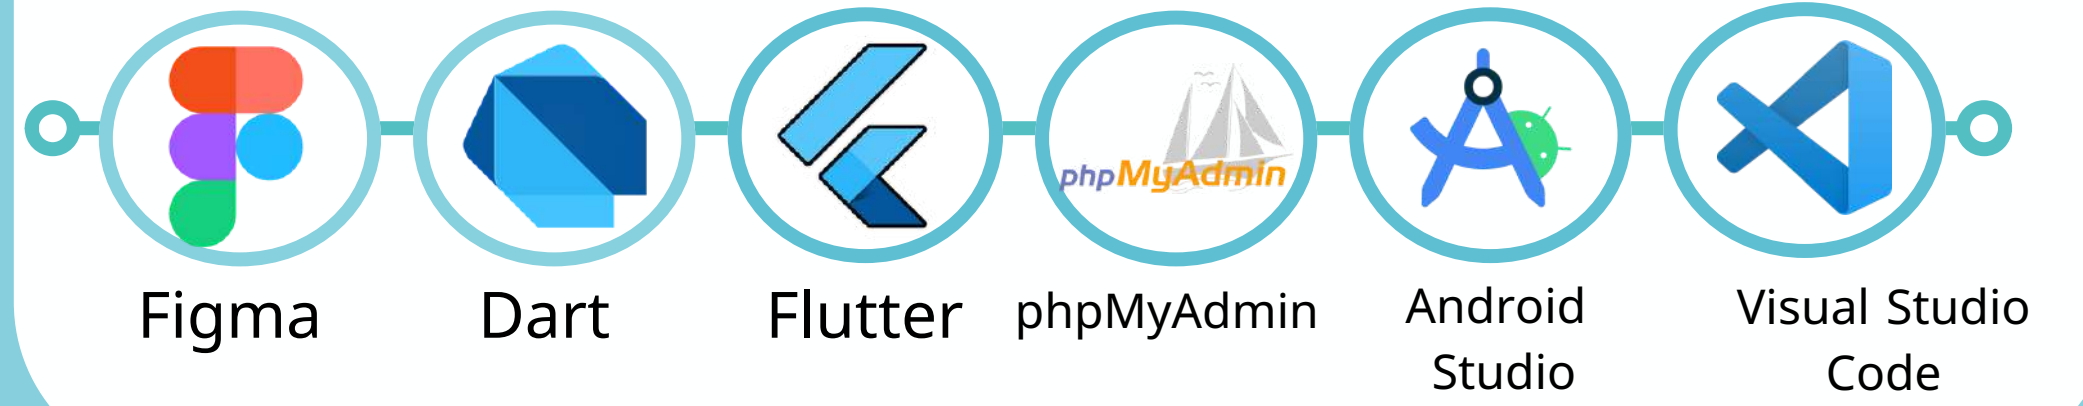

## Proposed system features:

- connects parents with certified and experienced tutors.
- Enables parents to input their specific tutoring needs.
- Matches the profiles of registered tutors with the parents' requirements .
- Displays all matched tutors' profiles to parents.
- Enables parents to view the tutor previous ratings and vice versa.
- Enables parents to rate tutors after finishing the course and vice versa.

## Methodology:

## Development Tools:

## Results:

### Parent side

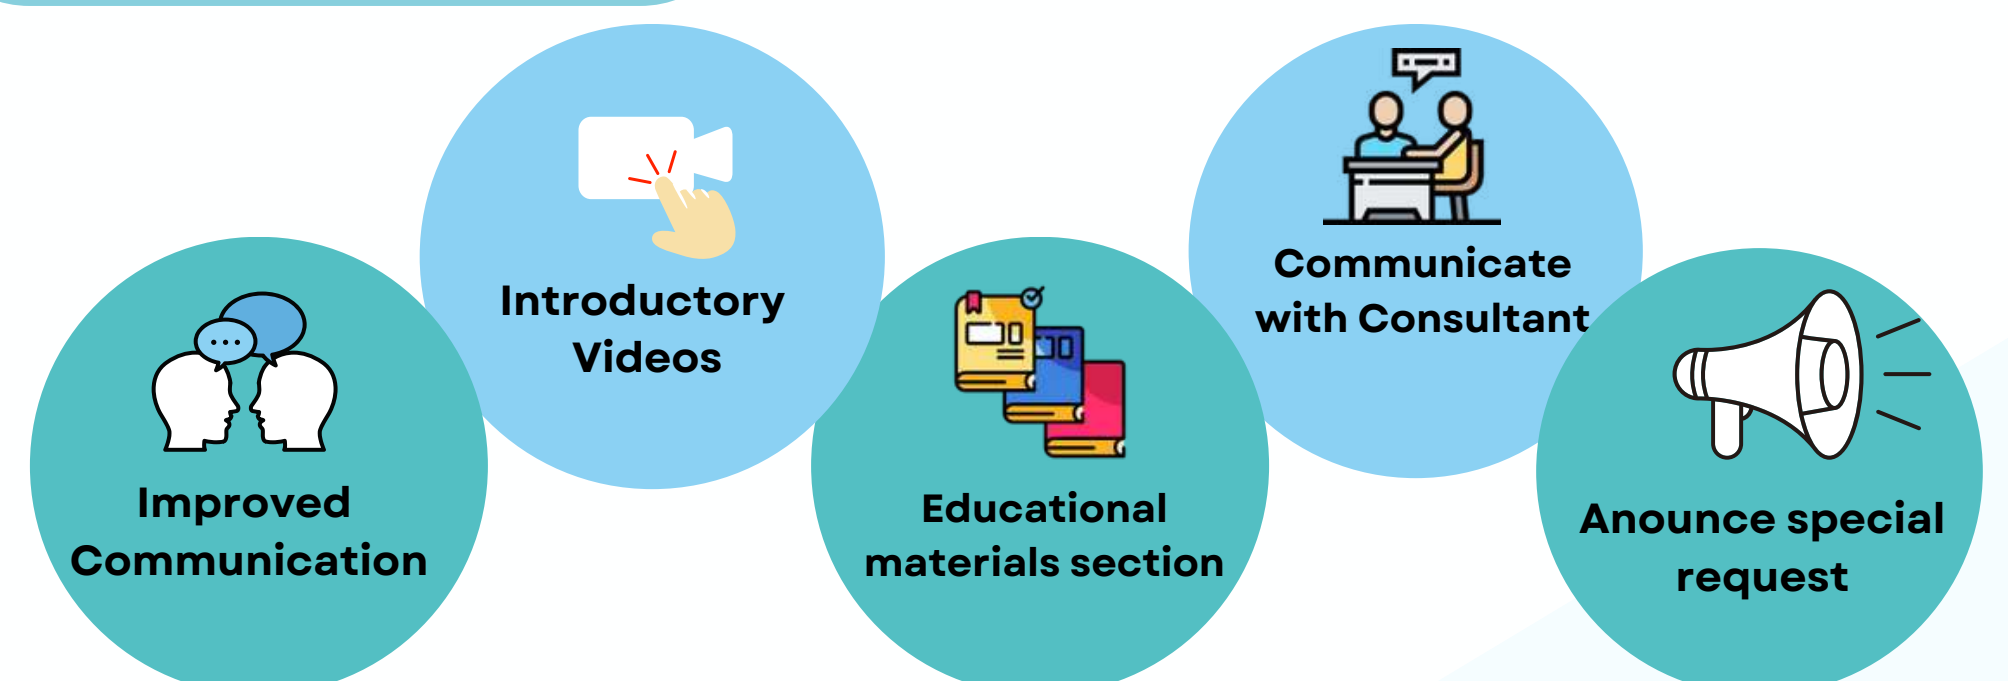

### Tutor side

## Conclusion:

Thaber recommends private tutors to parents according to their preferences, saving them time and effort spent in finding private tutors.
